	Page
EXECUTIVE SUMMARY	iii
LIST OF ACRONYMS	xxvii
1.0 INTRODUCTION.....	1-1
2.0 PERMIT ADMINISTRATION	2-1
3.0 LEGAL AUTHORITY.....	3-1
4.0 SOURCE IDENTIFICATION.....	4-1
4.1 GIS SOURCE IDENTIFICATION DATA	4-1
4.2 URBAN BMP/SWM FACILITIES DATABASE.....	4-5
5.0 DISCHARGE CHARACTERIZATION	5-1
5.1 FREDERICK COUNTY'S LONG-TERM MONITORING PLAN	5-1
5.1.1 Chemical Monitoring.....	5-4
5.1.2 Biological Monitoring Results for Peter Pan Run	5-44
5.1.3 Physical Stream Assessment.....	5-45
5.1.4 Integrated Analysis of Field Results	5-49
5.1.5 Plans for Future Long-Term Monitoring	5-52
5.2 EVALUATING THE EFFECTIVENESS OF THE <i>2000 MARYLAND</i> <i>STORMWATER DESIGN MANUAL</i> FOR STREAM CHANNEL PROTECTION.....	5-56
5.2.1 Study Area	5-56
5.2.2 Study Methods	5-59
5.2.3 Field Survey Methods.....	5-59
5.2.4 Field Data Analysis by Tributary	5-63
5.2.5 TR-20 and HEC-RAS Model Development	5-68
6.0 MANAGEMENT PROGRAMS.....	6-1
6.1 STORMWATER MANAGEMENT PROGRAM.....	6-1
6.1.1 Maintenance Inspections of Stormwater Management Facilities	6-1
6.1.2 Implementation of <i>2000 Maryland Stormwater Design Manual</i>	6-2
6.2 ILLICIT CONNECTION DETECTION AND ENFORCEMENT PROGRAM.....	6-3
6.2.1 Illicit Connection Program.....	6-3
6.2.2 NPDES Permit Evaluation Process For County-Owned Properties	6-4

TABLE OF CONTENTS (Continued)

	Page
6.3	SPILL RESPONSE..... 6-6
6.4	EROSION AND SEDIMENT CONTROL PROGRAM..... 6-6
	6.4.1 Responsible Personnel Certification Classes..... 6-7
	6.4.2 Construction Site Data..... 6-8
6.5	PUBLIC OUTREACH AND EDUCATION PROGRAM..... 6-8
	6.5.1 Public Outreach Related to Monocacy & Catoctin Watershed Alliance (MCWA)..... 6-9
	6.5.2 Other NPDES Outreach Initiatives..... 6-18
6.6	ROAD MAINTENANCE ACTIVITIES..... 6-22
6.7	HERBICIDE, PESTICIDE, AND FERTILIZER USE STUDY..... 6-25
	6.7.1 Introduction..... 6-25
	6.7.2 Herbicide Use..... 6-25
	6.7.3 Pesticide Use..... 6-29
	6.7.4 Fertilizer Use..... 6-30
6.8	OVERALL PROGRAM EVALUATION..... 6-30
7.0	WATERSHED RESTORATION..... 7-1
7.1	STREAM MONITORING TO IDENTIFY AND EVALUATE WATER QUALITY PROBLEMS..... 7-1
7.2	BIOLOGICAL AND PHYSICAL STREAM ASSESSMENT..... 7-1
	7.2.1 Water Quality..... 7-4
	7.2.2 Physical Habitat..... 7-5
	7.2.3 Biological Assessment..... 7-5
7.3	SURVEY OF MONITORING PROGRAMS IN FREDERICK COUNTY..... 7-7
7.4	COUNTRYWIDE STREAM ASSESSMENT..... 7-8
7.5	IMPLEMENTATION AND TRACKING OF RESTORATION EFFORTS IN FREDERICK COUNTY..... 7-9
	7.5.1 Regulations..... 7-9
	7.5.2 Tracking Pollutants..... 7-10
	7.5.3 Restoration Projects by Type..... 7-12
	7.5.4 Implementation Strategy and Timeline..... 7-12
7.6	WATERSHED ASSESSMENT AND RESTORATION..... 7-12
	7.6.1 Lower Bush Creek..... 7-16
	7.6.2 Ballenger Creek..... 7-17
	7.6.3 Linganore Creek..... 7-20
	7.6.4 Bennett Creek..... 7-27
	7.6.5 Impervious Area Reduction in Other Watersheds..... 7-29

TABLE OF CONTENTS (Continued)

	Page
8.0 PROGRAM FUNDING.....	8-1
8.1 PROPOSED FY 2008 OPERATING BUDGET	8-1
8.2 APPROVED FY 2007 OPERATING BUDGET	8-2
8.3 PREVIOUS YEARS' OPERATING BUDGET.....	8-3
8.3.1 FY 2006 Operating Budget.....	8-3
8.3.2 FY 2005 Operating Budget.....	8-3
8.4 PROPOSED FY 2008 CAPITAL IMPROVEMENT PROJECT BUDGET.....	8-4
8.5 APPROVED FY 2007 CAPITAL IMPROVEMENT PROJECT BUDGET	8-4
8.6 PREVIOUS YEARS' CIP BUDGETS	8-5
8.6.1 FY 2005-2006 Capital Improvement Project Budget	8-5
9.0 POLLUTANT LOADINGS FOR MUNICIPAL STORM OUTFALLS AND REMOVAL BY ASSOCIATED BMPS.....	9-1
10.0 SPECIAL PROGRAMMATIC CONDITIONS	10-1
10.1 CHESAPEAKE BAY AGREEMENT	10-1
10.2 TOTAL MAXIMUM DAILY LOAD REQUIREMENTS	10-2
11.0 REFERENCES.....	11-1

APPENDICES

A County Attorney Certification	A-1
B County GIS Data.....	B-1
C Database Submittals.....	C-1
D Updated Pollutant Loading Estimates for Municipal Storm Outfalls.....	D-1
E Methods for Estimating Pollutant Loading in Peter Pan Run.....	E-1
F Summary of Stream Survey Data for Peter Pan Run.....	F-1
G Evaluating the Effectiveness of the <i>2000 Maryland Stormwater Design Manual</i> for Stream Channel Protection – Supporting Materials.....	G-1
H Erosion and Sediment Control Quality Assurance and Quality Control Program.....	H-1
I Public Outreach Materials.....	I-1
J Highway Operations Quarterly Reports.....	J-1
K Prioritized Watershed Listing	K-1
L Summary of Stream Biological and Physical Monitoring Data for Ballenger, Bennett, Bush, and Linganore Creek Sites Sampled in 2006	L-1
M Fiscal Information on NPDES Projects in Frederick County's CIP Program.....	M-1

TABLE OF CONTENTS (Continued)

	Page
N NPDES Permit Compliance for County-owned Properties	N-1
O Integrated Pest Management Plan for Frederick County Public Schools	O-1
P CIP Selection Process	P-1
Q Materials Related to Survey of Stream Monitoring Programs.....	Q-1

LIST OF TABLES

Table	Page
4-1 Status of GIS data required by NPDES permit.....	4-3
5-1 Annual physical and biological sampling schedule for watershed monitoring stations ..	5-4
5-2 Annual stream chemistry sampling schedule for the instream and outfall stations.....	5-4
5-3 Parameters and detection limits for Frederick County's Water Chemistry Monitoring Program.....	5-8
5-4 Summary of storm events at the Peter Pan Run monitoring station	5-8
5-5 Rainfall data (totals by month; inches).....	5-21
5-6a Water chemistry results for instream stormwater monitoring at Peter Pan Run.....	5-24
5-6b Water chemistry results for outfall stormwater monitoring at Pond R.....	5-25
5-6c Water chemistry results for instream baseflow monitoring at Peter Pan Run	5-26
5-6d Water chemistry results for outfall baseflow monitoring at Pond R	5-26
5-7 Comparison of annual average Peter Pan Run EMCs from storms sampled between October 1, 2005 and September 30, 2006, with Maryland state average EMCs for all land uses, and with Maryland water quality standards.	5-28
5-8a Storm event flow in cubic feet and acre-feet. Pollutant loads in pounds per storm event at Peter Pan Run.	5-37
5-8b Storm event flow in cubic feet and acre-feet. Pollutant loads in pounds per storm event at Pond R Outfall.....	5-37
5-9a Baseflow and stormflow concentrations with estimated annual baseflow and stormflow loads in Peter Pan Run.....	5-39
5-9b Baseflow and stormflow concentrations with estimated annual baseflow and stormflow loads in Pond R Outfall	5-39
5-10a Baseflow and stormflow concentrations with estimated Fall (October-December 2005) baseflow and stormflow loads in Peter Pan Run	5-40
5-10b Baseflow and stormflow concentrations with estimated Winter (January-March 2006) baseflow and stormflow loads in Peter Pan Run	5-40
5-10c Baseflow and stormflow concentrations with estimated Spring (April-June 2006) baseflow and stormflow loads in Peter Pan Run	5-41
5-10d Baseflow and stormflow concentrations with estimated Summer (July-September 2006) baseflow and stormflow loads in Peter Pan Run	5-41
5-11a Baseflow and stormflow concentrations with estimated Fall (October-December 2005) baseflow and stormflow loads in Pond R Outfall.....	5-42
5-11b Baseflow and stormflow concentrations with estimated Winter (January-March 2006) baseflow and stormflow loads in Pond R Outfall.....	5-42
5-11c Baseflow and stormflow concentrations with estimated Spring (April-June 2006) baseflow and stormflow loads in Pond R Outfall.....	5-43
5-11d Baseflow and stormflow concentrations with estimated Summer (July-September 2006) baseflow and stormflow loads in Pond R Outfall.....	5-43

LIST OF TABLES (Continued)

Table	Page
5-12	Scoring classes for the Index of Biotic Integrity used by the MBSS indices 5-45
5-13	Summary of 2005 results from Peter Pan Run using MBSS 2005 IBIs 5-45
5-14	Summary of changes to Frederick County’s long-term monitoring efforts..... 5-55
5-15	Summary of conditions within the study area..... 5-58
5-16	Summary of stormwater pond construction and catchment land cover status..... 5-58
5-17	Summary of geomorphic parameters relative to a fixed study elevation: 2003-2006 ... 5-64
5-18	Bank erosion pin observations in November 2006..... 5-66
6-1	Current status of discharge permits for County-owned properties, originally issued in 2004-2005 6-5
6-2	Responsible personnel (Green Card) Classes held in Frederick County in 2006 6-8
6-3	Summary of public outreach and education activities 6-10
6-4	Quantity of recycled material by type..... 6-19
6-5	Household Hazardous Waste Day events 6-20
6-6	Snow removal materials used in 2006, by watershed 6-24
6-7	Pesticide, herbicide, and fertilizer use by Frederick County agencies, 2003-2006 6-26
7-1	Stream stations monitored by Frederick County in 2006 7-2
7-2	Scoring classes for the Index of Biotic Integrity used by the MBSS indices 7-6
7-3	Summary of 2006 results using MBSS 2005 IBIs 7-6
7-4	Current and planned watershed restoration projects within Frederick County..... 7-13
7-5	Summary of candidate restoration projects in Linganore Creek watershed 7-22
7-6	Summary and ranking of candidate CIP watershed restoration opportunities in Linganore Creek 7-23
8-1	Tasks assigned using FY 2007 funds..... 8-2
8-2	Tasks assigned using FY 2006 funds..... 8-3
8-3	Tasks assigned using FY2005 funds..... 8-4
8-4	CIP Project Funds Requested for in FY 2008..... 8-4
8-5	CIP Project Funds available in FY 2007..... 8-5
8-6	FY 2006 status of CIP projects 8-6
9-1	Percent removal of pollutants by stormwater management structure type 9-2
9-2	Event mean concentrations (EMC) for each parameter used for estimating pollutant loads (Schueler 1987) 9-2
9-3	Summary of percent pollutant removal by stormwater BMPs..... 9-5

LIST OF FIGURES

Figure	Page
2-1 Organizational chart.....	2-3
5-1 A graph from the Urbana Region Plan shows the increase in residential lots with construction of the Urbana PUD, which began in 1999	5-1
5-2 Annotated aerial photograph (March 2000) of Peter Pan in Lower Bush Creek watershed, Frederick County, Maryland showing the Peter Pan Run monitoring stations	5-3
5-3a The “storm box” and rain gauge at the ambient instream monitoring station at Peter Pan Run in the Lower Bush Creek Watershed, Frederick County, MD.....	5-5
5-3b Ambient instream monitoring station at Peter Pan Run in the Lower Bush Creek Watershed, Frederick County, MD.....	5-5
5-4 Villages of Urbana “Pond R” outfall water chemistry monitoring station	5-6
5-5a Hydrograph and rainfall (recorded at 15 min. intervals) for the October 7, 2005 storm event.....	5-10
5-5b Hydrograph and rainfall (recorded at 15 min. intervals) for the November 16, 2005 storm event.....	5-10
5-5c Hydrograph and rainfall (recorded at 15 min. intervals) for the December 29, 2005 storm event.....	5-11
5-5d Hydrograph and rainfall (recorded at 15 min. intervals) for the January 11, 2006 storm event.....	5-11
5-5e Hydrograph and rainfall (recorded at 15 min. intervals) for the February 2, 2006 storm event.....	5-12
5-5f Hydrograph and rainfall (recorded at 15 min. intervals) for the April 3, 2006 storm event.....	5-12
5-5g Hydrograph and rainfall (recorded at 15 min. intervals) for the May 11, 2006 storm event.....	5-13
5-5h Hydrograph and rainfall (recorded at 15 min. intervals) for the June 2, 2006 storm event.....	5-13
5-5i Hydrograph and rainfall (recorded at 15 min. intervals) for the July 12, 2006 storm event.....	5-14
5-5j Hydrograph and rainfall (recorded at 15 min. intervals) for the September 1, 2006 storm event.....	5-14
5-5k Hydrograph and rainfall (recorded at 15 min. intervals) for the September 14, 2006 storm event.....	5-15
5-6a Hydrograph and rainfall (recorded at 15 min. intervals) for the October 7, 2005 storm event.....	5-15
5-6b Hydrograph and rainfall (recorded at 15 min. intervals) for the November 16, 2005 storm event.....	5-16
5-6c Hydrograph and rainfall (recorded at 15 min. intervals) for the December 29, 2005 storm event.....	5-16
5-6d Hydrograph and rainfall (recorded at 15 min. intervals) for the January 11, 2006 storm event.....	5-17

LIST OF FIGURES (Continued)

Figure	Page
5-6e Hydrograph and rainfall (recorded at 15 min. intervals) for the February 2, 2006 storm event.....	5-17
5-6f Hydrograph and rainfall (recorded at 15 min. intervals) for the April 3, 2006 storm event.....	5-18
5-6g Hydrograph and rainfall (recorded at 15 min. intervals) for the May 11, 2006 storm event.....	5-18
5-6h Hydrograph and rainfall (recorded at 15 min. intervals) for the June 1, 2006 storm event.....	5-19
5-6i Hydrograph and rainfall (recorded at 15 min. intervals) for the July 12, 2006 storm event.....	5-19
5-6j Hydrograph and rainfall (recorded at 15 min. intervals) for the September 1, 2006 storm event.....	5-20
5-6k Hydrograph and rainfall (recorded at 15 min. intervals) for the September 14, 2006 storm event.....	5-20
5-7 Rainfall totals for sampled storm events.....	5-21
5-8 Annual rainfall recorded at NOAA's Emmitsburg, MD station, WY 1999-2004 and at NOAA's Damascus, MD station, WY 2005-2006.....	5-22
5-9 Monthly rainfall recorded at the Peter Pan site and long-term average monthly rainfall recorded at NOAA's Emmitsburg, MD station.	5-22
5-10 Annual discharge measured at Peter Pan Run instream monitoring station, WY 2000-2006.	5-23
5-11 Storm discharge plotted as a function of rainfall for storm events monitored at Peter Pan Run, for each year sampled, WY 1999-2006.	5-23
5-12 Annual flow-weighted average of baseflow mean concentrations and storm event mean concentrations of copper and zinc at Peter Pan Run instream site.....	5-30
5-13 Annual flow-weighted average of baseflow mean concentrations and storm event means concentrations of lead and cadmium at Peter Pan Run in stream site	5-30
5-14 Analytical results of instream storm event total copper and total zinc in individual samples.....	5-31
5-15 Annual flow-weighted average of baseflow mean concentrations and storm event mean concentrations of TKN and nitrate and nitrite at Peter Pan Run instream site.....	5-31
5-16 Annual flow-weighted average of baseflow mean concentrations and storm event mean concentrations of phosphorus at Peter Pan Run instream site.....	5-32
5-17 Annual flow-weighted average of baseflow mean concentrations and storm event mean concentrations of TSS at Peter Pan Run instream site	5-32
5-18 Analytical results of instream and outfall storm event and baseflow fecal coliform concentrations	5-33
5-19 Annual flow-weighted average of baseflow mean concentrations and storm event mean concentrations of copper and zinc at Pond R outfall site	5-35
5-20 Analytical results of outfall storm event total copper and total zinc	5-35

LIST OF FIGURES (Continued)

Figure	Page
5-21 Annual flow-weighted average of baseflow mean concentrations and storm event mean concentrations of TSS and phosphorus at Pond R outfall site	5-36
5-22 Annual flow-weighted average of baseflow mean concentrations and storm event mean concentrations of TKN and nitrate and nitrite at Pond R outfall site.....	5-36
5-23 Bank loss as measured by the bank pin at PPAN-01.....	5-47
5-24 Cross sectional changes at PPAN-01 between 1999 and 2006.....	5-47
5-25 Cross sectional changes at PPAN-02 between 1999 and 2006.....	5-48
5-26 Dominant substrate particle size at Peter Pan Run stations, from June 1999 to June 2006.....	5-48
5-27 Storm event means for metals (May 1999 to September 2006)	5-50
5-28 Storm event mean concentrations for TSS (May 1999 to September 2006).....	5-50
5-29 Storm event mean concentrations for phosphorus and nitrate + Nitrite (May 1999 to September 2006).....	5-51
5-30 Relationship between storm event mean concentrations for phosphorus and TSS	5-51
5-31 Storm event mean concentrations for metals at the outfall station	5-53
5-32 Storm event mean concentrations for TSS at the outfall station.....	5-53
5-33 Storm event mean concentrations for phosphorus and nitrate + nitrite at the outfall station.....	5-54
5-34 Relationship between storm event mean concentrations for phosphorus and TSS at the outfall station.....	5-54
5-35 Index of Biological Integrity classes for Peter Pan Run monitoring in 2006.....	5-55
5-36 Study area under predevelopment land cover.....	5-57
5-37 Stormwater ponds and treated areas in the study area	5-57
5-38 Stream channel protection study area indicating field sites and stormwater management pond locations	5-61
5-39 Example of new bank erosion and cumulative bank loss data at a cross-section	5-65
5-40 Change in substrate size distributions at SX-08 on Tributary 1A	5-66
5-41 Change in substrate size distributions at XS-05 on Tributary 1B.....	5-67
5-42 Change in substrate size distributions at XS-08 on Tributary 1	5-67
5-43 Segment longitudinal profile bed elevations at straight-line Point C on Tributary 1A .	5-69
5-44 Segment longitudinal profile bed elevations at straight-line Point E on Tributary 1B..	5-69
5-45 Segment longitudinal profile XS-02 to XS-01 bed elevations at straight-line Point C on Tributary 1	5-70
5-46 Hyetograph and hydrograph for rainfall and stream flow event of April 2, 2005	5-71
5-47 Comparison of peak flows for design storms for three land use scenarios: pristine, agricultural, and 2005 development/construction.....	5-72
5-48 Carriage Hill Drive crossing downstream of cross-section XS-04 in Peter Pan Run Tributary 1 as represented in a profile view in HEC-RAS	5-74
5-49 Footbridge upstream of cross-section XS-01 in Peter Pan Run as represented in a profile view in HEC-RAS	5-74

LIST OF FIGURES (Continued)

Figure	Page	
5-50	The 1-, 2-, 5-, 10-, 25-, 50-, and 100-year NRCS rainfall event recurrence interval flows from TR-20 simulations and resulting water levels simulated in HEC-RAS for present landuse conditions in measured cross-sections along Peter Pan Run.....	5-76
5-51	The 1-, 2-, 5-, 10-, 25-, 50-, and 100-year NRCS rainfall event recurrence interval flows from TR-20 simulations and resulting water levels simulated in HEC-RAS for agricultural landuse conditions in measured cross-sections along Peter Pan Run...	5-77
6-1	Monocacy & Catoctin Watershed Alliance logos.....	6-9
7-1	2006 stream monitoring locations within Ballenger Creek, Bennett Creek, Lower Bush Creek, and Linganore Creek watersheds	7-3
9-1	Percent pollutant removal by BMP type for Frederick County outfalls based on the Simple Method.....	9-3
